INTRODUCING THE NEW ERA OF HEALTHY CARPET CLEANING

Healthy Carpet cleaning is defined as the removal of soil, stains and allergens from carpets without the use of toxic chemicals. ServiceMaster has embraced this development because we are concerned about the welfare of the people that work and live in the environments we clean, the long term health of our cleaning technicians and the impact of chemicals on the environment.

1. LEAVES NOTHING HARMFUL IN THE CARPETS AFTER CLEANING

With ServiceMaster GREEN FOR™ Carpets we conduct a complete, safe and deep penetrating cleaning that loosens accumulated soils without the use of harmful detergents, surfactants or VOC's. Regardless of the method of cleaning, or the thoroughness of the technician, a portion of the cleaning agent will always remain in the carpet after cleaning. GREEN FOR™ Carpets residue contain no products or substances that would not normally be found in human body chemistry.

2. SAFE FOR ALL OCCUPANTS IN THE OFFICE INCLUDING INDIVIDUALS WITH ASTHMA AND CHEMICAL HYPERSENSITIVITY

Recent studies have shown that 1 in 5 adults and children will be more sensitive to chemicals than the general population. Our customers have told us that they are very concerned about the environment they provide for their employees. Until recently, effective cleaners for industrial and commercial carpet cleaning contained ingredients that could directly affect indoor air quality. GREEN FOR™ Carpets is safe for all individuals in the office environment.

3. REDUCED IMPACT ON THE ENVIRONMENT

Traditional commercial and household carpet detergents contain ingredients that have not proven to biodegrade...ever! ServiceMaster has found a way to clean using only natural ingredients commonly consumed. Your office indoor air quality can be improved by cleaning your carpets with GREEN FOR™ Carpets. GREEN FOR™ cleaning products contain only ingredients listed as generally safe for human consumption by the Food and Drug Administration. They do not contain any petrochemicals, NTA, EDTA, ALKALI builders, solvents or VOC's. GREEN FOR™ Carpets is independently tested, audited and certified by ENVIRODESIC, ENVIRONMENTAL CHOICE, and GREEN SEAL.

4. EFFECTIVE CLEANING AND COSTS

Clean carpet projects a professional image and helps maintain a healthy working environment. GREEN FOR™ Carpets programmed maintenance ensures that your business looks its best. Following procedures recommended by carpet manufacturers, ServiceMaster Clean GREEN FOR™ professionals will design a carpet maintenance program tailored to your specific facility needs. Our skilled cleaning specialists use GREEN FOR™ products and techniques to protect the original beauty of your carpet and provide a pleasing overall appearance in an environmentally safe and cost efficient manner. The bottom line is this: GREEN FOR™ Carpets' cost is the same as traditional cleaning methods, but is safer for the environment.

5. EXCELLENT AFTER CARPET CLEANING APPEARANCE

GREEN FOR™ Carpets eliminates carpet resoiling due to chemical residue and keeps carpets cleaner longer than regular cleaning detergents. Traditional detergents attract dirt and grease. GREEN FOR™ Carpets does not, resulting in a healthier environment and cleaner carpet appearance.

BENEFITS OF GREEN FOR™ CARPETS MAINTENANCE

- Maintains carpet's rich appearance and texture
- Extends the life of your carpet investment
- Guarantees maintenance costs
- Reduce carpet soiling after cleaning
- Little or no impact on the environment
- Safe for all office staff
- Indoor air quality can be improved
